The most adaptable console control solution
for critical operation environments

COMMAND WATCH
A modular and versatile furniture-grade console solution designed for critical operations and monitoring environments.

The modular Command Watch console is designed around the rigorous demands of a 7x24 environment but not at the expense of style and aesthetics. Numerous straight and corner module options allow for extreme configurabilty to optimize useable space within the room and maximize operator productivity.

COMMAND TECH
Economical and robustly designed open air slatwall technical furniture solution with integrated power and cable management.

The Command Tech is targeted to control rooms which are less concerned about being a showcase and simply need to perform while staying within tight budget realities. The Command Tech console includes all the elements required for high productivity in a network operations center or control room at much lower cost than a fully enclosed console.

COMMAND WATCH ADJUSTABLE
Furniture grade 7x24 console furniture with adjustable height work surfaces for operator ergonomics and comfort.

Monitoring applications which require the operator to be relatively stationary can create uncomfortable and possibly injurious working conditions. The Command Watch Adjustable helps to alleviate operator fatigue by providing an electronically adjustable work surface height.

COMMAND TECH ADJUSTABLE
A sit/stand console solution intended for the emergency response & control room environments.

Command Tech Adjustable feature adjustable height work surfaces for keyboards and/or monitors to help operators customize their work space for their optimum ergonomics. These are often used in environments which require operators to constantly man their workstations such as dispatch and emergency response.

MONITOR ARMS
A state of the art LCD mounting system for the Command Watch console line of products. Bild monitor arm system is a highly configurable solution for multi-monitor applications. With endless configurations between 2 and 16 displays.

SLATWALL ACCESSORIES
Slatwall mountable accessories to keep binders, manuals and important papers within reach. The Command Watch line of products offers a number of slatwall accessories to help keep operators and their console work surface clean and orderly.

TASK LIGHTING
Versatile slatwall mountable task lighting allows you to position the location and level of lighting to optimal needs of the operator. Command Watch Task Lighing is designed to meet the demanding quality and functional standards of the critical facility environment providing proper illumination, preventing eye strain and increase operator productivity.

7X24 OPERATOR SEATING
7X24 network operation task chairs intended for operators sitting for long periods of time within a critical facility environment. Professional computer chair that can be used in conjunction with furniture grade console solutions within the demanding network operation center environment.

LARGE DISPLAY MOUNTS
Large screen displays integrated directly to or adjacent with your console furniture. Easily integrate large screeen displays to your Command Watch or Command Tech console configuration.

POP-UP POWER / DATA / USB
Ensure that power, network and USB connections are always within reach of operators.

CUSTOM MILLWORK
Custom accessories to match consoles provide added functionality.

Console furniture provides operators with a productive work area for critical applications. However, there is often a requirement for other specialized furniture items to further enhance productivity. We can also manufacture custom enhancements attached to the console furniture itself including cases for hardware, locking storage units or shelving for top of slat wall.

MATRIX DATA WALL
An ultra thin and near-seamless matrix of displays provides critical content to your staff in high definition.

The next-generation Matrix Data Wall System delivers a new level of visual performance and is optimized for uninterruped 24x7 operation. This immersive, flexible Matrix solution combines the industry's thinnest profile ultra-narrow bezel LED LCD wall system that supports extended operation, requires minimal installation space and provides outstanding improvements in design and service.

The Command Watch family of console furniture enhances your control room with the superior aesthetics required to convey your commitment to technology. Combining quality materials and exceptional design ensures functionality, productivity and operator comfort for years to come.
